-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 22 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Response to Amendment*

1. The indication of allowable subject matter on the previous office action is regretted and an action on the merit follows.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 27, 28, 30 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites a Markush group limitation consisting of

- (a) thermally decomposing a metal salt;
- (b) heating a metal powder;
- (c) reduction of a metal oxide;
- (d) coating the passage with resistive ink;
- (e) electrolessly depositing of one or more layers of metal; and
- (f) vapor depositing a metal.

Though claims 27, 28, 30 and 31 can further limit the limitations of group (a)-(c), and (e), they fails to further limit groups (d) and (f). That is, the recited steps in claims are not required for groups (d) and (f). Therefore, the claims are rendered indefinite.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 26-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,656,738 to Vogel et al. in view of US 4,550,036 to Ludwig et al.

(claims 26, 27, 30 and 31) Vogel teaches a method of manufacturing a fluid vaporizing device comprising: providing a fluid passage in body (Fig. 3A), the fluid passage having an inlet opening and an outlet opening; and forming a tubular heater by depositing a thin resistive film inside the passage (col. 6, lines 41-42), the heater being operable to volatilize fluid in the passage by passing an electrical current through the film. Vogel is silent with regards to the type of depositing step. Ludwig teaches a method of depositing a metal to a surface comprising electrolessly depositing a layer of metal in solution (col. 1 lines 22-30). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the step taught by Ludwig since electroless deposition of a metal in solution is well known in the art, as stated by the applicant in the disclosure (page 19, line 1).

(claim 28) Vogel teaches conductive contacts **86**.

***Response to Arguments***

6. Applicant's arguments with respect to claims 26-31 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
